An oven-safe dish is a dish that can be used in the oven and is made from materials that can withstand high temperatures. Oven-safe dishes are often used for baking and cooking casseroles, lasagnas, cakes, and brownies.

Materials

Cast iron
A classic material that's durable and distributes heat evenly

Stainless steel
A durable metal that can handle high temperatures without warping

Ceramic
A durable material that's often used for baking dishes and casserole dishes

Glass
A popular material for baking dishes

Porcelain
A durable material that's often used for baking dishes and casserole dishes

Features

Coating: Some dishes may have a glaze or coating that should be lead-free and non-toxic

Thickness: Thicker dishes are more heat-resistant than thinner dishes

Heat distribution: Oven-safe dishes should distribute heat evenly to prevent breakage

Labeling

The easiest way to tell if a dish is oven-safe is to check for an oven-safe symbol or label

Safety

Don't put oven-safe dishes in the oven while it's preheating

Putting a non-oven-safe pan in the oven can melt the handle and destroy the pan
